

BLUEPRINTS: A Childrens Story

Blueprints is a childrens story for children from ages 4-5. The story writes an indelible imprint of how the relationship of a father and son creates male leadership between each other. In nineteen tastefully illustrated pages the story of Blueprints reinforces how a father can instill leadership to a young boy and broaden his outlook. The story is an everyboy story that relies on the strength of the natural bond that grows between father and son from the teachable moments of life.
