

How Emotional Problems Develop

How Emotional Problems Develop helps us understand why people have problems growing emotionally, and therefore spiritually. The process of becoming an adult that needs to occur in each person's life is sometimes interrupted by the inability to deal with emotional pain. Most people have at least some unresolved pain from their past which must be healed so they can live a full life spiritually, emotionally and relationally. How Emotional Problems Develop explains how healing this unresolved pain can occur using a model that was laid out for us in Scripture, the model that Jesus used with His disciples. Worldwide Discipleship Association is committed to building disciples of Christ. As part of disciple building, the WDA Restorative Ministry has developed a process called Restoring Your Heart, which helps people grow and heal both relationally and emotionally. It was developed as a direct result of discovering that emotional healing is essential for spiritual growth. This book will lay the groundwork for understanding the importance of emotional healing. Topics include: sources of pain for children; results of unresolved pain; typical adult problems that result from unresolved pain; the healing process and how to find help.
