

Englands Long Reformation: 1500 - 1800 (Neale Colloquium in British History)

Englands Long Reformation brings together a distinguished team of scholars, who seek to advance beyond current debates concerning the English Reformation. It puts the religious changes of the 16th century in longer perspective than has been traditional and counters the recent emphasis on the popularity of pre-Reformation Catholicism. Instead the case is argued for an underlying trajectory of evangelical activity from the 1520s. The contributors also examine some of the hybrid religious forms which developed and the propagation of the more uncompromising messages of Puritanism and Counter-Reformed Catholicism.; Taking their cue fom continental historians, the authors demonstrate the insights which can be derived by taking a long view of the Reformation in England. The processes of Protestantization and indeed Christianization were involved, with each new generation needing to be won over or at least re- educated. The interaction of religion and society - particularly as regards the so-called reformation of manners - is another central theme. Ranging from Tudor Norwich to Hanoverian Bristol, the work collectively breaks down some of the artificial barriers created by periodization and encourages a new way of looking at the English Reformation. This volume should prove valuable reading for those interested in the making of a Protestant nation.
