

# Enhancing the Livelihood of Farmers through Dynamic Beekeeping

The purpose of this book is to create awareness and provide decision support information about opportunities that beekeeping offer to farmers and rural communities in terms of incomes generation. The main focus is how beekeeping can be integrated into small farms or set as a main enterprise to increase incomes and enhancing livelihoods. Beekeeping is a helpful programme that has the potential to promote livelihood by giving people opportunities for reliable alternative incomes, reduce poverty through employment creation, provide key inputs for the development of allied industries including the pharmaceutical industries and enhance environmental conservation.
