

Growth and Yield of Garlic (*Allium sativum* L.): Effects of varieties, Inter Row and Intra Row Spacings at Dabat, North Ethiopia

Garlic is one of the top *Allium* crops in-terms of production and consumption next to onion. This book covers the factors that affect the yield and growth of garlic with great emphasis on the effects of varieties and plant spacings. Additionally, taxonomy and classification, morphological structure, ecology, growth and development pattern of garlic are written in detail. It is very useful for growers, investors, developmental organizations and so on.
