

Studies on antimicrobial, biochemical and image analysis in Mirabilis jalapa

Masters Thesis from the year 2013 in the subject Biology - Botany, , course: Plant studies, language: English, abstract: Nature has been a source of medicinal agents for thousands of years and an impressive number of modern drugs have been isolated from natural sources, many based on their use in traditional medicine. Various medicinal plants have been used for years in daily life to treat disease all over the world. They have been used as a source of medicine. The widespread use of herbal remedies and healthcare preparations, such as those described in ancient texts like the Vedas and the Bible, has been traced to the occurrence of natural products with medicinal properties. The book contains research studies on antimicrobial, biochemical and image analysis in Mirabilis jalapa
