

Tony Hunt presents, for the first time, the complete set of illustrations which accompany a 13th-century Anglo-Norman translation of Roger of Parma's Surgery (c.1180), the first original treatise on surgery to be written in the medieval West. His commentary relates the drawings precisely to the sections of text they illustrate, providing accurate identification of the different medical treatments depicted, fusing careful translation from the Latin text with modern medical perception. These distinctive drawings, almost without parallel in 13th-century England, show a consummate medical illustrator at work and reveal a great deal of information on the medieval pharmacy and the range of therapeutic treatments practised. TONY HUNT is the author of Popular Medicine, Plant Names of Medieval England and Teaching and Learning Latin in Thirteenth-Century England.

A dictionary of chemistry: on the basis of Mr. Nicholson's, in which the principles of the science are investigated anew and its applications to the ... agriculture, and manufactures detailed, Yoga Journal, Issue 181 (June, 2004), If Any Man Would Follow Me, Von den Sternen zu den Galaxien: Die Milchstraße und der Kosmos (German Edition), Pictorial Astronomy, Horizons in Biochemistry, The Giving Gnome Harvest, Annalen der Physik (Volume 2) (German Edition), Dragon Twins Adventures, PIRATEN PATEN UND PRIMATEN (German Edition),
