

Ecology of Grasslands and Bamboolands in the World

In 1967 and again in 1970 and 1977 I consulted in Tokyo with Mrs. Schluter of VEB Gustav Fischer Verlag, Jena, about the plan for a new book on the ecology of the worlds grasslands and bamboolands. Upon being requested to be the editor of this new publication, two important books on the subject immediately came to mind, a famous classic by J. W. Bews on The Worlds Grasses (1929) and a new book Grasses and Grasslands edited by C. Barnard (1964). At the same time, the International Biological Program had begun, and I became responsible for the Japanese Grassland Project under the sponsorship of the Ministry of Education. I personally conducted the field study and synthesis on Japanese semi-natural grasslands the results of which were published as Ecological studies in Japanese Grasslands with Special Reference to the IBP Area-Productivity of Terrestrial Communities (JIBP Synthesis Vol. 13, University of Tokyo Press, 1975). During this period, two books on grassland ecology were published in Japanese, and International Synthesis Volumes are in preparation for publication by the Cambridge University Press, including two volumes on grasslands. In relation to grassland productivity studies, I attended the Second Meeting of the PT Grassland Working Group of IBP held at Saskatoon and Matador, Canada, in 1969 (the proceedings entitled Grassland Ecosystems Reviews of Research edited by R. T. Coupland and G. M. Van Dyne, 1970), and a synthesis meeting at Fort Collins, Colorado, U. S. A. in 1972.
