Aug 24, 2006 Future IAU Meetings . In addition to all the exciting astronomy discussed at the General that the Solar System consists of eight planets Mercury, Venus, Earth, Mars More dwarf planets are expected to be announced by the IAU in IAU President-Elect and member of the Planet Definition Committee. **Bad Astronomy** Aug 20, 2010 Slow and Steady: Astronomy Advisory Report Charts a Long Road for Exoplanet Science of potentially habitable worlds but offers few details for the near future The study of planets outside the solar system was one of the hottest Committee, which advises NASA and other government agencies. **Other worlds from earth: the future of planetary astronomy : a report** The IAU decided to create a committee to gather opinions from a broad range of scientific interests, with input from professional astronomers, planetary scientists **Other Worlds from Earth: The Future of Planetary Astronomy : a** Jul 7, 2006 Overall Planet Finding Program Finds Other. Earths and Astronomy and Astrophysics Survey Committee, National Research Council, Other. Worlds From Earth: The Future of Planetary Astronomy, NASA, 1989. Summary Report on Architecture Studies for the Terrestrial Planet Finder, NASA/JPL. **CAB Presentation to Astrophysics Subcommittee of NASA Advisory** Jul 3, 2012 The Planetary Society is deeply troubled with the priorities reflected in NASAs FY13 budget. of Representatives Committee on Science, Space, and Technology. there is, or has been, life on other worlds such as Mars or Europa. program of missions in Earth Science, Astronomy and Heliophysics. **Assessment of Planetary Protection Requirements for Spacecraft - Google Books Result OTHER RECENT REPORTS OF THE SPACE STUDIES BOARD** Assessment of ReportsNew Worlds, New Horizons in Astronomy and Astrophysics (Board on Physics and Astronomy [BPA] and SSB, 2011) Recapturing a Future for Space of NASA Earth and Space Science Missions (SSB, 2010) Defending Planet **Planetary protection - Wikipedia** Planetary protection is a guiding principle in the design of an interplanetary mission, aiming to In 1959, planetary

protection was transferred to the newly formed Committee on . Others are assigned provisional categories by COSPAR, pending future Restricted Category V: Earth-return missions from bodies deemed by **Planetary Society Statement on Proposed Cuts to Planetary Science** Interplanetary contamination refers to biological contamination of a planetary body by a space . Life on other planets could have a common origin with Earth life, since in the early Solar System there was much exchange of material . The European Space Foundation report cites many advantages of a Mars sample return.

Panel ReportsaNew Worlds, New Horizons in Astronomy and Astrophysics - Google Books Result Genre, Astronomy. Publisher, United States National Research Council. Published, March 7, 2011. Media type, hardcover, PDF. The Planetary Science Decadal Survey is a publication of the United States National Research Council produced for NASA and other United States Government Agencies such as the National Science The report highlighted a new Mars rover, a mission to Jupiters moon Europa, **Definition of planet - Wikipedia** OTHER REPORTS OF THE SPACE STUDIES BOARD Assessment of a Plan for U.S. on Physics and Astronomy [BPA] and Space Studies Board [SSB], 2012) Earth from the New Worlds, New Horizons Decadal Survey (BPA and SSB, 2012, /ssb/ssb.html COMMITTEE ON PLANETARY **Naming of Astronomical Objects** IAU Jul 7, 2006 Overall Planet Finding Program Finds Other. Earths and Planetary Astronomy Committee of the Solar System Exploration Division, Other. Worlds From Earth: The Future of Planetary Astronomy, NASA, 1989. Summary Report on Architecture Studies for the Terrestrial Planet Finder, NASA/JPL. 2002. **Other Worlds from Earth: The Future of Planetary Astronomy : a** The discovery of 2003 UB313 Eris, the 10th planet largest known dwarf planet In the astronomical world, Eris stirred up a great deal of trouble among the to 50 times the sun-earth distance over its 250 year orbit, while the new planet moves from . No other planet in the solar system -- dwarf or otherwise -- goes through **What is a Planet? Division for Planetary Sciences** The Solar System is the gravitationally-bound system comprising the Sun and the objects that orbit it, either directly or indirectly. Of those objects that orbit the Sun directly, the largest eight are the planets, . All the planets, and most other objects, orbit the Sun in the same direction that the Sun is The Once & Future Sun. **IAU 2006 General Assembly: Result of the IAU Resolution votes** The committee discusses how to integrate astronomical discoveries into our to image Earth-like planets beyond our solar system, and to learn whether . Many focus on sky phenomena, while others report on recent developments. .. astrophysicists can reasonably anticipate a number of future interactions with physics:.

Pluto and the Solar System IAU - International Astronomical Union The definition of planet, since the word was coined by the ancient Greeks, has included within its scope a wide range of celestial bodies. Greek astronomers employed the term *asteres planetai* (??????? ???????), . When Copernicus placed Earth among the planets, he also placed the Moon in orbit around Earth, making **4.
