

The Practice of Chemistry

Students cant do chemistry if they cant do the math. The Practice of Chemistry, First Edition is the only preparatory chemistry text to offer students targeted consistent mathematical support to make sure they understand how to use math (especially algebra) in chemical problem solving. The books unique focus on actual chemical practice, extensive study tools, and integrated media, makes The Practice of Chemistry the most effective way to prepare students for the standard general chemistry course--and bright futures as science majors. This special PowerPoint tour of the text was created by Don Wink: http://www.bfwpub.com/pdfs/wink/POCPowerPoint_Final.ppt(832KB)
