

## You Are In God: God Is In You (Science and Spirituality)

We are not told the truth of the reality of who we are and what this universe of ours, including our beautiful blue planet, offers us. The universe is in God, for there was nowhere else for it to be when the source of everything created this universe, including both its space and time. Before that act of creation there was nothing here, as the tell-tale echoes of energy waves bouncing off what previously existed do not seem to exist. Not only that, but the scientists and theologians working at the leading edge of both science and spirituality tell us that God is in this universe at the level of the sub-atomic particles and on up, all the way to the ends of the universe. As well, God is involved in the ongoing creation processes of this universe, because change is the real essence of where we are. Virtually everything that we think that we know about this universe of ours, including planet earth, is badly limited and reality is not what we see, hear, sense, smell, etc. - in fact reality is very much different from what we sense. We see a piece of solid iron and think that it really is solid but, if all of the mass of iron were placed in the center of a huge football stadium, it would be smaller than a too-small-to-see mote of dust in mid-air in that stadium's open space. We also hear less than is possible, over the full range of sound, sense only a limited part of the roughness, smell just a fraction of what produces volatile compounds, and so on. We have been taught that the world of mass and energy is built from the bottom up and it is just happenstance that determines what will work as chemistry, physics and life - that too is incorrect. The universe is fine-tuned to have us exist and all of the things that occur, from rocks to living creatures, exist and grow in a universe that guides the development of materials and life in a way that selects only those combinations that are likely to be successful. This is not a random universe, but one very much

guided by a Creator. We are all little packets of God, with limitations galore, but made in the image of God, because God decided to make us that way. We are not just animals but spiritual beings having a human journey in the earth school, so that we can find our weak areas and strengthen them, becoming more spiritually powerful. We can rely on having those experiences that will help us grow happen to us - although we have free will we do not have to learn from them, but the lessons are and will be there. We have a great deal of power over our local conditions, because we were made with that power, but our society, including families, schools, churches, governments and businesses do not support our finding out who we really are. Once we realize that we are spiritual beings who will never die, although our bodies will die, we are virtually uncontrollable. Those with money and power live in fear and try to control everything and everyone, in attempt to create the sense of safety - they do not succeed, but try again and again. Once you realize just who you really are and why you are here, you are unlikely to be a threat to any except the truly evil ones, but the rich and powerful do not see things that way. Your job, should you accept it, is to learn about love, become loving and then grow beyond unconditional love to joy and peace and, finally to and through enlightenment. The task is difficult and scary, as you deal with your doubts, but it is worth it. This book, by a fellow student on the journey, will provide you with some background information that can help you get going. Your first teachers should not be too far ahead of you, so learning from other students is a less-threatening way to start. The author provides you with other books, but also with the names of better teachers once you are ready for them. Take the steps needed to move along the path - it is your destiny! Enjoy the trip and love with gusto!
