

## Universe: A Journey from Earth to the Edge of the Cosmos

Embark on the most astounding of odysseys, a voyage into realms not only stranger than we can imagine but also far, far more beautiful. *Universe: A Journey from Earth to the Edge of the Cosmos* leads us into a celestial panorama that extends for 130 billion trillion kilometres (80 billion trillion miles) in every direction, and allows us to explore nearly 200 of the most extraordinary astronomical views ever uncovered. Complementing these up-to-date and spectacular images are enlightening descriptions of the planets, stars, nebulae, white dwarfs, supernovae, black holes and other exotica that populate our universe.
